

Dear Commission:

WKSX's very existence as a stand-a-lone in the Appalachian mountains of North Carolina, depends on localism. Local news, local events, local interviews, local weather, local people...we survive with one of the states highest Arbitron AQH percentages of listenership.

Our broadcast days are filled with local information and interviews.

I urge you to examine the public files of stations suspected of failing to meet this responsibility and not penalize those of us who are with more paperwork.

Sincerely,

Jan R. Caddell
President/GM
